United States renew commitments for Afghanistan

1/13/2016

Dear President Asfraf Ghani:

I am sure you have observed and evaluated President Obama's detailed military, social and political statement on Afghanistan.

It is important that the trust of the United States for the people of Afghanistan which was perverted during the mafia and corrupt regimes of the past have been bestowed again.

President Obama addressing the people of Afghanistan, at that respect he states that " In closing , I want to speak directly to those whose lives are most directly affected, most by the decision I'm announcing today. To the Afghan people, who have suffered so much---. Americans committed to you and to a secure, stable and unified Afghanistan, that remain firm. Our two nations have forged a strategic agreement for the long term and as you defend and built your country, today is a reminder that the United States keep our commitments."

This is a very important part of the statement that is emphasizing on by-national long term strategic commitment by two nations. Mainly reminding and warning to those domestic players and rogue nations who are trying to jeopardize Afghan people relations with the United States and NATO countries that have been gained after forty years of

sacrifices of the Afghan people.

To preserve our independence during the 19th. and 20th. centuries and during the cold war we have sacrificed every hope of prosperity for the traditional believe, in God-country and freedom.

The countries who played and created for the benefit of the satanic games of the powerful nations, have used every opportunity to jeopardize our economic, social, political, historical and religion sectors. They are the ones who are now apposing our relations with the United States and NATO nations.

Past forty years of destructive wars and unable, traitor, corrupt and mafia style governments of Afghanistan have opened the door for our enemies to destroy our productive institutions to dump their products in our country and destroy our relations with our friendly states.

Eight million persons, over half of the eligible people in the nation voted to elect the leadership to restore traditional believe in God-country and freedom and to finally restore law and order, bring the corrupt mafia groups for justice, restore stolen national and personal properties, relieve our agriculture land from poppy productions and restore and develop the productive sectors for self sustain economy. To sit with the Taliban political and capable leaders to bring them out of the ISI satanic control to make an acceptable peace inside their country. Majority of those voters are now very disappointed.

Previous government traitors and mafia groups, was not only brought to justice, but they are given more opportunities and positions at this government for further controlling and robbing the nation and travelling around the world drumming for revising the cold war and to spoil the hopeful relations of Afghanistan with the rest of the prosperous nations.

Our enemies realize that Afghanistan with its geopolitical location, natural resources and valiant people, the support of the United States and other industrial and friendly nations will become a prosperous commercial bridge at the heart of Asia.

Germany, Japan and South Korea after the wars were in the worst shape, with their loyal service of their capable governments and support and hard work of their people, have brought their countries among the most prosperous nations, they are independent and proud nations of the world, also having forces of their allied nations on their lands for their support and their security in this complicated world.

Twenty first century technological developments and dependency in social and economic sectors have brought the countries close and interconnected with each-other, the competitions and rivalry among some nations or group of nations, does not leave much hope for the

non-allied nations to survive or prosperous in isolation, it will be more logical and hopeful to be allied with the group of nations that they are the most powerful and prosperous of all,

President Obama's statement is also a warning to corrupt and unstable governments, while and if the government was not accepted by the people of Afghanistan, the United States will stand with the people of Afghanistan for a secure, stable and unified Afghanistan. You and Dr. Abdullah have been elected by the vote of the people, during the election the demands were clear by the people and the promises were made. A year after your rules now the judgement is made, the corrections and fulfilling of the national responsibility from both of you is needed. I am presenting few points to guide the elected government to be able to establish the STATE to be the symbol of unity between people, government and its responsible institutions, which will follow the proper policy for the survival and prosperity for your unity government.

1. You have to stand shoulder by shoulder with Dr. Abdullah in front of the nation vouch with each other and vouch to the people that you both work for the people and the nation of Afghanistan with your best ability and total honesty and follow every step of your responsibilities for the benefit of the nation, without leaning to your family, political and tribal affiliations. Afghan people may have been left behind proper education but have the experiences of hundreds years of political and governmental understandings and are very aware of the political games.
2. Clean your government from known corrupt and mafia agents who fail you and are flaming the divisions in your leadership, announce true unity policy which is only for the benefit of Afghanistan under the constitution and public needs and support. Work with courage for the people to be supported by the people.
3. Establish three independent national courts (Military-political and economic) headed each by three judges two Afghans and one from some Islamic countries like Turkey, Malaysia or Indonesia. Call every one, from Prime Minister Maiwandwal's assassin to the last president to respond for their crimes and injustices against the nation and the people of Afghanistan during the past forty years..
4. Military services was the pride of the nation for over hundred years, Afghan young people from all over the country served under the flag of the nation as their national obligations (Mukalafiat), with Afs.200.00 salary a month, they served and secured the nation with their life, they were the pride of our national defense with no

foreign helps.

From the time US forces came to the country and the military and police forces is paid about Afs.10,000.00 monthly with the foreign funds, our military changed from Mukalafiat to the financial interest.

The worst part is, as you have heard it time after time the announcement of General Azimi former defense department speaker at President Karzai,s time, that "WE HAVE GIVEN 75% OF OUR MILITARY SHARE TO THE JEHADI GROUPS." I am not going to explain this unjust and immoral decisions that have created an army with questionable morality that can not protect the borders or defend our cities against few armed people.

It is the demand of the people to expand the military services for all the people of Afghanistan to serve the nation with their national obligations not for the interest or influence of some individuals or groups.

5. Total disarmament of all these so called Jihadi groups, who are threatening our people and the peace in our nation every day, is badly needed.

Also there are some radical groups and domestic and foreign enemies who are working to attract our unemployed and dis-satisfied people to join them to create such an inferno in the country that not only destroy your government but the flame will burn many nations in this region .

You still have chance to get to the side of the people and respond to their demands they are your honest allied which make you successful in your national programs.

6. Announce that you are not going to induce in any peace meeting with Afghan Taliban in Pakistan and or under the influence of their institutions.

Call on Afghan Taliban political and former leaders in Qatar, Turkey or other nations and their armed groups in Pakistan to come to their country to sit with the people of national objective group under the observation of the Chines, US and other interested nations, to discuss the peace process for the nation. Or organize this process in a third country like China, Turkey or Saudi Arabia.

7. Work diligently with India and Iran for the commercial route through Cha-Bahar route and with China and the countries at the north of Amu Darya with the help of our allied countries for completing the silk road for the commercial benefit of Afghanistan and the neighboring countries. Work on a strategy to work with the concerned nations to connect this rout through Baluchistan to the Indian ocean.

8. You need the genuine support of the United States, the NATO nations

specially the British to help Afghanistan to relieve the 250,000 hector agriculture land of Afghanistan from poppy production, which is producing 90% of the world opium. Most of this product went to the foreign markets through our open routes to Pakistan. The only product that we are exporting is opium and each and every of our needs are imported mostly from Pakistan.

9. I have presented the list of our domestic products that was not only covering our needs, but also exported to the foreign countries during fifties, sixties and seventies, to the previous responsible people like President Karzai, and the US authorities from the president to their ambassadors in Kabul, to be restored and revitalized for the prosperity of the nation, sadly no responsible and loyal action was implemented.

Past fourteen years over hundred billions of dollars dumped in Afghanistan. You all were part of the leaderships. You all had extended the right hands for the donors and the left hand to the contractors, who robbed the donors and spoiled immoral and corrupt persons related to all government officials to the highest positions in bribes for cheating all the related projects.

None of these domestic and foreign leaders have had the knowledge and ability or any interest to look at this nation that have had the foundations for developing projects in all sectors of life that was supporting this nation forty years back without any help from outside donors.

No one told Americans and other industrialized nations, that we have been the center for commercial route before Alexander came to Afghanistan and we have dealt in a free market for centuries, our ministry of planning does not mean that we have a centralized planning economy like former Soviet Union, our economy is a mixed system to provide the services by the public institutions for development of the social and economic sectors of our free market systems.

Any how gross atrocities have been made during the past fourteen years, that was the reason that people lined-up all over the country to elect a government to serve the nation and bring peace, security, law and justice and prosperity.

Some of the following projects does not need timely evaluations and academic thoughts but could be put in process with the help of the private investors, government support and friendly nations cooperation;

**** Share of Amu Darya water for irrigation and agriculture projects; which irrigates millions of acre bare lands from Dusht Shadian to Dusht Layli, jobs for hundred thousands farmers families and produce grains for hundred million people, the project was prepared sixty

years back, it may be at the Ministry of Agriculture files. This project can be implemented with the cooperation of the US with Afghan engineers and agriculture and economic experts.

**** Arghandab river power plant, this project will have the capacity of two thousand kilowatt electricity that will suffice the needs of power from Amu to Attack river territories. The plan for this project was also prepared in late 1950,s , it may still be found from the files of Agriculture-Irrigation department; this project can be accomplished with our friendly nations of Germany and Japan with the help of our qualified engineers who are working all over the world.

****Kundoz Cotton Company and cotton fields developments with the help of our friend Egypt and Afghan experts and investors with support and incentives of the government.

**** Revitalize the textiles companies in various provinces, protect, support and gave all incentives for their machinery and technological needs, Afghan investors will be happy to invest at these projects.

**** The gas of Sheberghan exported from 1960 to 1990 to the former Soviet Unions that paid their loans in double, has been closed in the past twenty five years

this project should come in service with the help of our friendly nations and Afghan engineers for the energy use for the northern and central provinces that are having severe fall and winter months.

**** Kokcha and Farkhar rivers have very healthy mountain water, private investors should be encouraged, security and incentives be provided to have a healthy bottle water for the nation and exports.

**** One hundred preserving centers in the major cities needed to preserve fruits and vegetables that is perishing every year. An american experienced company should be invited to built the warehouses, our solar energy will be good source of power for these centers. I am sure Afghan producers with the government supports and incentives will share the cost of this long tern profitable project.

**** Kabul river have become center of sewage and drug users that is threatening the health of the city, sixty years ago there were mini dams on the river, the city had some use of their water and the river kept the air fresh. I have been many times in the country in the past ten years, I have passed the messages to the mayor and top government authorities, no one cared. This is very important, few mini dams from Kota-e-Sangi to Pul Charkhi, the river will have water the whole year and also provide fresh and healthy air for the people live around the river.

**** It is embarrassing and irresponsible that we are building intercity roads for millions of dollars in the country and we forget

or ignore to built resting areas for the use of the male and female passengers that are travelling by hundreds of thousands on these roads. This is a public responsibility ignored for many years, you should have an immediate action to establish this service on all roads in the country.

**** Built a sizable secure compound walls centers in every city for the producers for small and large productive private businesses, the security should be provided by the army and police, I am sure the revenue the government will receive from these private businesses will be far more then the cost of the security provided.

**** You have to invite capable Afghan international commercial lawyers with some UN experts in the field to write the law for commercial legal mining in the country, which should be enforced indiscriminately on local and foreign investors.

**** We have thousands of retired and active teachers all over the world, you can invite around fifty of them for few months to the country to write the text books in all subjects for students from kindergarten through the college in major Afghan languages for Afghan students with taking in consideration the culture and history of the nation, also have the ministry of education printing facilities to be activated for printing these text books, you will not only save millions of dollars, but also you do not have to go through painful and timely waiting for these books to be produced in the foreign countries.

10. The history from our nation and the world around provide examples of the successful leaderships in the world. Courage, honesty, justice and satisfactions of the mass have been given the highest score for successful long and satisfy leaderships.

Democracy without law and justice is meaningless and provide anarchy, you can see many examples around you in all sectors of life in Afghanistan. Three factors of democracy (social justice-economic equality and political freedom) have not been completely implemented during the history in the world, except during the time of Mohammed and four Rashidun Khalifas, you can endure democracy with law and order and justice for all.

With the hope of peace, law and order and justice for prosperous Afghanistan.

Regards. Essa Tokhi
